MET-2 Second Generation Versatility

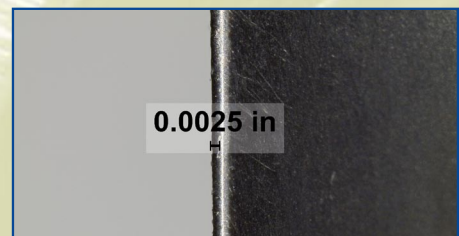

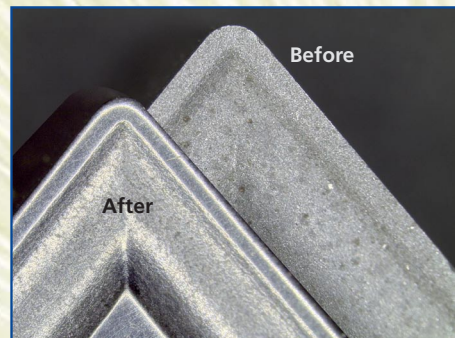

MET-10 for inserts

Edge Prep 101

Learn about the many benefits of edge preparation for drills, mills, inserts – virtually any cutting tool. Our stand-alone machines feature full view of the process in real time. Create and store custom “recipes”. You can even change your own brushes.

- ▶ Our recently updated MET-2 can handle rotational cutting tools of all types.
- ▶ The newly-minted MET-10 is an out-of-the-box solution for inserts of all types.
- ▶ We offer silicon carbide, ceramic and diamond brushes along with years of experience in using them.
- ▶ A variety of close-tolerance inspection and measurement systems is also available.
- ▶ We provide piece work service for small lots.

We invite you to call or visit our web site to learn more about our edge prep process, and how we help cutting tools perform better and last longer.

MET equipment is proudly made in the USA.
